

Tasmania Branch

## A Message From Our Experienced Team

*With over 30 years of experience within the agricultural, dairy and commercial industries, our experienced, friendly staff at Water Dynamics Tasmania can provide you with a range of irrigation solutions tailored to your needs.*

*We are specialists in T-L Hydraulic Centre Pivots, broadacre irrigation and specialists in providing complete irrigation and pumps service and repairs.*

*Living and working within our community means we understand the unique local conditions and challenges, and we have the relevant skills to provide the right products and technical advice to keep your irrigation system operating at peak efficiency.*

*At Water Dynamics Tasmania, we aim to be your most valued irrigation partner.*

**a**gricultural land occupies approximately 25% of Tasmania, with the pristine environment and fertile soils providing the perfect conditions for cultivating a wide range of high-value horticultural and agricultural products. From cattle and dairy to cereals and potatoes, water needs to be a sustainable commodity in order to achieve consistent production quality and volume. Modern irrigation systems are both water-efficient and cost-effective, providing the exact amount of pressure and coverage, minimising water costs and waste.

Water Dynamics Tasmania is your irrigation modernisation specialist, with proven capabilities across horticulture, broadacre and livestock. Our team has the experience and expertise to deliver the best solution every time. We treat each project as unique and design and install each system based on its individual requirements.

### Service and Repair

To keep irrigation systems performing at an optimal level, we recommend implementing a preventative maintenance program during off season to ensure peak performance when the irrigation season commences.

Our team of highly skilled technicians use their local knowledge to devise a maintenance program to meet the needs of each system, based on system usage and the surrounding environmental conditions.

However, even with a preventative maintenance program in place, minor issues or breakdowns can still occur. Our technicians can service and repair all brands of irrigation systems, even those not directly sold by us. They're on-call outside business hours for emergency break-downs.

***“Water Dynamics Tasmania is your irrigation modernisation specialist”***

## Solutions for...

### Agriculture and Horticulture

- Whether your farm needs a new system installed or an upgrade or replacement for an existing system, we have got you covered. We are experienced in designing, supplying and installing irrigation systems across Tasmania, from hobby farmers to large scale farms.
- Our technicians are experienced in the installation of various irrigation products and systems including drip, micro and centre pivots and will ensure that the most efficient system is selected to maximise quality yields.
- Water Dynamics Tasmania is one of Water Dynamics' leading T-L irrigator suppliers. With depth of knowledge and decades of experience, our complete range of T-L centre pivot and linear irrigator maintenance services are quality, comprehensive and unmatched in Australia.

### Livestock farms

- Water is a vital component for both the pastures and the animals. We design, supply, install and maintain systems unique to your environment, covering all aspects of livestock, including pasture irrigation, stock watering, feed production, facility cooling and water for dairy operations.
- We also specialise in the supply and service of a large range of pumps to complement the watering systems required.

### Local Residential Irrigation

- Water Dynamics has everything you need to achieve a healthy, lush lawn. From custom designed supply and install packages to DIY sprinkler systems and accessories. We have what you need to create a lawn and garden to be envied, whilst reducing your water usage and adding value to your home.
