

Lifting Lamb Survival – Potential into Product

LOCATION Northern Tasmania

TIME

Starting June 2020

Session 1 - Setting up the lambing plan

Session 2 - ½ day coaching on participants' farms

Session 3 - Fine tuning the lambing plan

Session 4 - Reviewing the 2020 lambing season

What you will learn

- What are the key causes of lamb and ewe deaths during lambing?
- Strategies to improve lamb survival and reduce ewe deaths
- Best practice management for lambing
- Prepare ewes and lambing paddocks to enable a less stressful lambing

How you will learn

A six month coaching program including;

- Three group workshops on the Lifting Lamb Survival (Mt. Ireh Estate) (one full day and two half days)
- Half day “one on one” coaching session on each participant’s property
- “Hands on” planning and implementing your own lambing plan

Photo by Catriona Nicholls

Other features and benefits for you

Calculate lamb loss and ewe wastage, learn how to feed budget and allocate lambing paddocks, undertake lamb autopsies and diagnose causes of lamb loss, implement strategies to increase lamb survival, focus on lambing density and improving ewe and lamb nutrition.

“2018 was my first lambing season, while some others in the course were old hands. The program catered to all skill levels and everyone learnt something that benefited our lambing management. The skills I learnt, like assessing paddocks for lambing suitability, helped me make informed decisions to improve lamb survival and minimise ewe deaths during the 2018 lambing season. I would recommend this course to any producer looking to extend their knowledge on lambing management practices.” - Bree-Elle How, Annandale Pastoral (2018 Lifting Lamb Survival participant)

Deliverer

Georgia McCarthy

Macquarie Franklin

P: 0400 763 904

E: gmccarthy@macfrank.com.au
